

GREENLAND MINING SERVICES A/S

**YOUR ALL ROUND ALL YEAR
BUSINESS PARTNER IN GREENLAND**

Specialized in 3 major areas

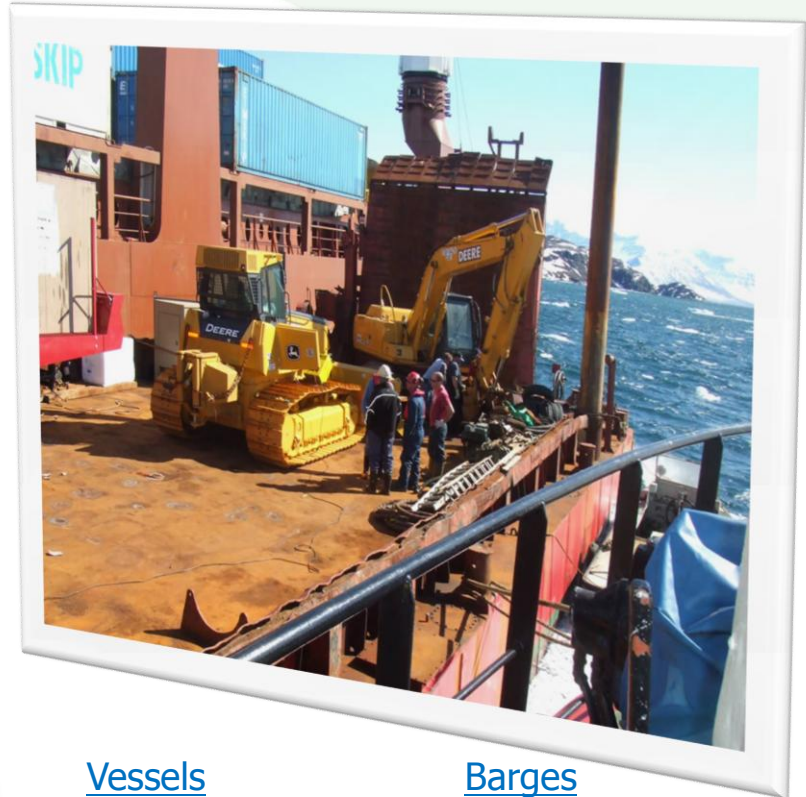

1. Sea transport and other operations at sea
2. Construction/contracting and core drilling
3. Camp solutions and supplies

SEA TRANSPORT

Supporting the mining industry with goods and equipment.

Operations in connection to working on the ports and quays along the coast.

Vessels

- 1 diving/tug boat
- 3 landing crafts
- 2 personnel craft

Barges

- 1 800 t capacity
- 3 flat barges
- 1 box barge

Diving work for routine repairs of particular fishing fleet.

Underwater welding.

Repairs, maintenance and development of the quays along the coast.

Towing tasks.

Investigations and cleansing of the sea bed in the port areas.

CONSTRUCTION AND CONTRACTOR WORK

Buildings,
infrastructure, special
tasks beyond city limits
etc.

Quarry and associated
crushing plant.

Shipyard in Qaqortoq.

CORE DRILLING

Diamond drilling in all areas of Greenland.

Hiring of drillers and assistants from home and abroad.

Close contact with drill parts suppliers and manufacturers.

CAMP SOLUTIONS

Small fly camps for 2-4 man without kitchen, toilet and bath.

Larger camps 20-30 man with kitchen, bath and communication systems.

KEY WORDS - COMMUNICATION

- Participation in international mining conferences – PDAC
- Meet the representatives of the mining companies
- Use e-mails, phone, face to face
- Ongoing communication with clients/customers from start to end

- Well defined agreement

- Planning in good time a must in Greenland – most suppliers in Europe, USA or Canada

Know the laws in your field

- All tasks carried out according to regulations
- Good knowledge on legal requirements
- Reporting and contact to BMP

KEY WORDS – SUPPLIERS/SUBCONTRACTORS

Cooperation with well established and experienced suppliers and subcontractors

•LOCAL INVOLVEMENT & KNOWLEDGE

Example:

Canadian drillers and local drill assistants

Foreign drillers teach local drill assistants

Several local assistants are now ready

Quality management

Employee participation in:

- A well defined Health, Safety & Environmental Plan
- Best combination of ISO 9000, ISO 14000, EMAS, OHSAS18001
- Risk analysis, Workplace Assessment
- Frequent safety meetings

- Finish on time
- Proactive
- Accept long working days, also in weekends
